

ANNEX 1 WEBINAR

Impact of the New EU GMP Annex 1 on
Cleaning and Disinfection

Thursday, 4 May • BST 10.00 / CET 11.00

Annex 1 of EU GMP covers the manufacture of Sterile Medicinal Products, updated in August 2022 to take into account changes in technology, updates in regulatory expectations, and the introduction of ICH9 and 10. This webinar reviews the impact of the new Annex 1 on a life science facility's contamination control strategy and the implications for cleaning and disinfection protocols.

Why Attend?

- Reminder – what is the Contamination Control Strategy
- Where does cleaning and disinfection fit in the CCS
- Learn the difference between cleaning and disinfection
- Look at the background to why residue removal is key in the updated Annex 1
- Disinfectant rotation – what, why, and how?

Who Benefits?

- Microbiology
- QA / QC
- Production/Operations management
- SOP Compliance
- Contamination Control team
